

Please ensure this tracking sheet is completed as a group, as it will be used to monitor your individual participation within the team.

Team Members	Role/ Responsibility	Email
Paulette Dushime	Team lead. Built the shared training pipeline (train.py, play.py, Kaggle notebook), ran 10 hyperparameter experiments, MLP vs CNN comparison, trained the final model, recorded the gameplay demo, assembled the GitHub repo and README	p.dushime1@alustudent.com
KelvinRwihimba	Ran 10 individual hyperparameter experiments (intermediate lr/gamma values, batch-size extremes, epsilon floors and decay extremes) with a resumable runner on Colab; wrote up his noted behaviors and README section	K.rwihimba@alustudent.com
David Cyubahiro	Ran 10 individual hyperparameter experiments focused on hyperparameter combinations and interaction effects; wrote up his noted behaviors and README section	d.cyubahiro1@alustudent.com

Task Allocation and Tracker

Task Allocated	Assigned Member	Deadline	Completion Status (Not Started/In Progress/Completed/Did not participate)
Environment selection (ALE/Pong-v5) and shared pipeline setup on Kaggle	Paulette Dushime	Jul 13	Completed
train.py and play.py scripts	Paulette Dushime	Jul 13	Completed
Paulette's 10 hyperparameter experiments (500k steps each) + MLP vs CNN comparison	Paulette Dushime	Jul 14	Completed
Final model training (best config, 1M steps)	Paulette Dushime	Jul 14	Completed
David's 10 hyperparameter experiments (combination effects)	David Cyubahiro	Jul 17	Completed
Kelvin's 10 hyperparameter experiments	Kelvin Rwihimba	Jul 18	Completed
Gameplay video (play.py output, greedy policy)	Paulette Dushime	Jul 18	Completed
GitHub repository assembly, README, and results integration	Paulette Dushime	Jul 19	Completed
Presentation preparation and rehearsal	All members	22/07/2026	In Progress

Meeting Attendance Log

Meeting Date	Agenda	Facilitator	Attendees	Key Discussion Points
---------------------	---------------	--------------------	------------------	------------------------------

Jul 13	Assignment breakdown and task division	Paulette Dushime	Paulette, Kelvin, David	Chose Pong as the group environment; agreed Paulette builds the shared pipeline; each member to run 10 experiments using it; hyperparameter ranges divided to avoid overlap
Jul 18	Results review and integration (8pm meeting)	Paulette Dushime	Paulette, Kelvin, David	Reviewed all experiment results; identified Kelvin's initial runs used Breakout instead of Pong and agreed on a Pong rerun for consistency; reviewed the batch-size finding across members; assigned presentation sections and README contributions

Reviewed by Team? (Yes/No)	Comments
Yes	Debugged environment registration and frameskip issues; pipeline shared with all members
Yes	Hyperparameters configurable via CLI/function args; auto-logs results to CSV
Yes	Best single-knob result: batch=128 (+9.0); MLP stayed at -21 vs CNN +20.3
Yes	Greedy eval reward +20.3; saved as dqn_model.zip
Yes	Best result +19.0 (combo config); showed batch size cannot rescue a bad learning rate
Yes	Initial run used Breakout; rerun on Pong for group consistency. Best 500k result in group: batch=256 (+19.7)
Yes	3 episodes, each reward +20.0; mp4 in videos/
Yes	Each member committed their own results, notebook, notes, and README section
No	2 min per member on own experiments + group Q&A prep
